

DeepCardio-RAG Clinical Report System

AI-Powered Diagnostic Report | CONFIDENTIAL

PATIENT INFORMATION

Patient ID: APD-20260303-2132
Report Type: AI-Powered Arthritis Risk Assessment
Date: March 03, 2026 at 21:32
Gender: Female
Age: 45 years
Referring Physician: Dr. A. Smith, Rheumatology Dept.

ARTHRITIS RISK ASSESSMENT

LOW RISK

Confidence: 85.0%

Low Risk Probability: 85.0%

High Risk Probability: 15.0%

CLINICAL INTERPRETATION

Patient is at low risk.

LABORATORY RESULTS

Test Parameter	Result	Reference Range
Hemoglobin	12.5 g/dL	12.0-17.5
ESR (1st hour)	15 mm/hr	0-20
C-Reactive Protein	4.5 mg/L	< 6

IMPRESSION & RECOMMENDATIONS

IMPRESSION: Based on the AI analysis of the submitted laboratory parameters, this patient demonstrates a LOW risk profile for inflammatory arthritis. Current inflammatory markers are within acceptable limits.

RECOMMENDATIONS:

- Continue routine monitoring of inflammatory markers annually.
- Re-evaluate if joint pain, morning stiffness (>30 min), or joint swelling develops.
- Maintain healthy lifestyle: regular exercise, balanced diet, adequate vitamin D and calcium intake.
- Follow-up in 12 months for repeat blood work, or sooner if symptoms develop.
